File #: 26-1515

Agenda Date: 6/1/2026

Agenda #: 6.A.

Solving for safer. Communities, schools, hospitals, businesses everywhere.

TO: Linda Zerwin, ETSB Executive Director
FROM: Jennifer Hurd, Motorola System Manager
DATE: May 26, 2026
SUBJECT: STARCOM21 DEDIRS Monthly Report

Projects:

Code plug updates: All Fire agencies were sent an initial update that included two changes: NWC FD channels 1-4 to point to NWCD's new encrypted talk groups and a correction to both vFD3 and vFD3 Direct frequencies. A third change was found at a later date for a Zone 33 FG power correction and is being sent in a second push after the first update has been completed on all agency radios. These changes are pending the users update acceptance on the radio.

Code plug Creation: A new double code plug for the Police APX Next radios has been created. This includes both the current radio zones and channels and a second similar for use after the transition to AES encryption. The duplicate zone and channel names have the letter -E added after each to reference they are encrypted. ViQi has also been updated to reach the current channels with the same name or the duplicate encrypted channels by speaking the additional keyword 'secure' after the existing channel name. The Police Focus group is currently testing the double code plug; initial feedback has been positive.

SOP Probation - An APX Next code plug for Probation was created with the new encrypted talkgroups. These new radios including accessories were provided to the users on May 26. Probation will transition from APX4000 radios to the new APX Next radios on the date of the encryption changeover instead of a double code plug.

DEDIR System Radio Replacement:

APX Next XN Fire Portables Updates:

Phase 1: Complete as of April 2026

Phase 2: 21 agencies have completed the 2nd update, 8 remain
ADF, BLF, ITF, LWF, OTF, WRF, WFF, YCF

Encryption Project:

The ADP to AES encryption plan between ETSB and Motorola has been approved. A step-by-step plan has been created outlining the necessary steps to make the change to both the system and the radios. Please see the Gantt Chart for this project to see completed tasks.

Deployment is scheduled for: Tuesday 6/23/26
APX 4000 Portable: To Be Determined

The System Manager will have to work with agencies on the agency owned APX4000s for the transition. The APX4000 channel limitation evaluation was submitted to the Motorola encryption team. The APX4000s owned by ETSB have been replaced with APX Next radios.

Emergency activation configuration update was created to address a programming issue and a schedule was developed in Monday.com to update radios. Emergency activation configuration change has been applied to 22 agencies/397 radios have been programmed. There is 1 radio that remains to be programmed (Wheaton). If this radio fails to turn up prior to the encryption update, it will be swapped for an APX Next.

Wheaton PD WHP Stienke 426CXZ1209

Solving for safer. Communities, schools, hospitals, businesses everywhere.

APX8500 Mobile:

Boxed APX8500s have been returned to Motorola Solutions, Inc. as of March 2, 2026. Installed APX8500 will be returned when replacement units are ready.

APX7500 Mobile:

Motorola is working with ETSB to establish a plan to upgrade the mobiles to support TDMA, multikey encryption, and AES. This project is a low priority because of the move to a different mobile manufacturer.

CommandCentral Aware: With the approval of the first agency applications, Motorola is working with those submissions to test the layer concept. Access has been provided and input had been requested from several key users. Testing is ongoing and feedback is continuing to be shared. There are sixteen (16) remaining police agencies and nine (9) remaining fire agencies that will need to submit their CommandCentral Aware applications through Monday.com.

Radio Alignment: There were none last month.

STARCOM21 Scheduled Maintenance:

System Maintenance: Starcom maintenance is now being completed quarterly. The RSUS team completed the planned system patching.

5/13/2026 9:00 AM CDT

5/14/2026 8:30 AM CDT

System Patches / planned maintenance: There were none last month.

STARCOM21 Unscheduled System Outages: There were none last month.

CommandCentral Patches: There were none last month.

CommandCentral unplanned outage: There were none last month.

SmartConnect Patches: There were none last month.

Radio Central Patches: There were none last month.

Radio Management / CPS Patches: The DuPage hosted DMS Radio Management system for APX Standard radios was updated to R38.00.70 on May 13, 2026.

Radio Central Migration: One Bensenville PD radio remains outstanding to be transitioned to the new Radio Central. This radio is pending installation of an update.

Serial Number	Model Number	Codeplug Version	Firmware Version	Group	Radio Alias	Job Status	Last Contact Time
142CXX0922	H45TGT9PW8AN	R29.00.01	R04.61.00	BEP	BEP CARRERA	Running: Waiting For Device	1/30/2023 5:55:20 PM

Releases: Fire radios were deployed on firmware R09.40 which was released June 2025. All Police radios have also been sent version R09.40 and have been updated to match.

There are over 30 radios deployed on the newer firmware version numbering system 37.03 or 38.04. These units were updated when sent to the Depot for repair. There are no reported issues on the newer firmware at this time. Updating the fleet radio baseline firmware version for 2026 will be revisited in a few months after the Police Encryption project is completed.

Solving for safer. Communities, schools, hospitals, businesses everywhere.

Meetings:

PAC Meeting: Monday, May 4, 2026
Fire Focus Meeting: Wednesday May 13, 2026
Police Focus Meeting: Thursday May 21, 2026
ETSB Podcast: Wednesday May 13, 2026

Training: Initial training for the Encryption Project has been added to the Encryption DEDIR System Monday.com board. Please check back regularly as this is being updated periodically.

Motorola Project Manager Weekly Synch Report – Project Manager Rich Nita

Motorola Wednesday Morning Status Call – May 6, 2026

AXS Consoles: Open issues decreasing week over week, down to 2 issues, both resolved with active root cause being investigated. Gregg Taormina will advise on a decision to schedule/execute the DU-COMM console ATP. Final Acceptance pending for both ACDC and DU-COMM.

DFSI: DU-COMM currently working through **NAC code issue**. MSI development reviewed the Wireshark capture from Leonardo, confirmed the DFSI device is sending out the NAC (F7E) it was designed to. Leonardo expecting NAC 293. Checking with Leonardo to see what mods are possible from their side. The team also is working to resolve a port configuration issue: the Leonardo stations use the same control port (6999) and voice port (9666) across all stations, but the provisioning manager (PM) requires each port number per DCG to be unique. DU-COMM DFSI ATP gated by these two issues. ACDC: Crossmute - 5/5/26 Matt Downer working to complete proposed revisions to crossmute tables.

Encryption: From a pre-work perspective, all consoles at ACDC and DU-COMM have the UKEKs, RSIs, and passwords loaded. Matt and Sean completed a successful test of Provisioning Manager configuration on an OP at ACDC. Following that, Matt completed Provisioning Manager updates for all OPs on 5/5/26. OPs are now largely ready for migration to AES256. Note: The AISs at each location remains to prep, will require a KVL (Eve updated she can help facilitate this). Linda/Jen confirmed which agencies are to receive the double code plug. Tasks 1.3, 1.4, 1.5 - Jen updated she will be caught up on these soon.

Motorola Wednesday Morning Status Call – May 13, 2026

AXS Consoles: Remaining open issues resolved, with active root cause being investigated. Gregg will advise on a decision to schedule/execute the DU-COMM console ATP. Final Acceptance pending for both ACDC and DU-COMM.

DFSI: DU-COMM currently working through NAC code/port config issues. James Erlain followed up with Leonardo (thank you James) to see what mods are possible from the Leonardo side; Leonardo responded that they found an issue with how they're handling F7E when it arrives via DFSI. Leonardo engineering is looking to have this fixed soon. They are also working on the port assignment change to be customizable per Motorola's needs. Leonardo estimating to have both of these things completed within the next 3 weeks. ACDC: Matt Downer made progress with revisions to the crossmute tables, prepping for implementation within Provisioning Manager.

Solving for safer. Communities, schools, hospitals, businesses everywhere.

Encryption: Fleetmap was finalized and cache radios were programmed for testers from five agencies. Step (1.3) can go light green but will not be fully green until ETSB and the test users / Police focus group approve the double code plug to be sent to the rest of the users. John Nebl is distributing radios the week of 5/18/26 - once they receive and test, Motorola can start making all the code plugs. AIS modification (both dispatch sites) completed. 06/23/26 is the current go live target.

Motorola Wednesday Morning Status Call – May 20, 2026

AXS Consoles: Tracking zero open issues, however Motorola team still needs to pursue and report on root cause investigations. Erik Maplethorpe provided **green light to schedule/execute the DU-COMM console ATP**. Rich Nita will help coordinate, keeping the encryption project as the priority. Final Acceptance pending for both ACDC and DU-COMM console deployments.

DFSI: DU-COMM: Leonardo engineering is working on revisions to resolve **NAC code and port assignments** issues. ETA for both is potentially week of 5/25/26. ACDC: Matt D working with Jim C on revisions to the **crossmute tables**, prepping for implementation within Provisioning Manager.

Encryption: Progress made: project tracker Gantt tasks 1.3 and 4.1 are complete/fully green. John Nebl completed radio distribution to the smaller test group completed the week of 5/18/26; and we requested test group to review/test the code plugs ahead of the encryption dry run. Once complete we can start making all the code plugs. Nate Krause has cutover/go-live training materials drafted, minor tweaks in progress. 06/23/26 is the current go live target.

Motorola Wednesday Morning Status Call – May 27, 2026

AXS Consoles: Motorola team to report on root cause investigations for resolved/closed issues. DU-COMM console ATP to be scheduled following Encryption effort. Final Acceptance pending for both ACDC and DU-COMM console deployments.

DFSI: DU-COMM: Leonardo engineering is working on revisions to resolve **NAC code and port assignments** issues, ETA is ~week of 06/01/26. Matt D working with Jim C on revisions to the crossmute tables. Jim proposes a working session, after the encryption effort is complete to finish the revisions in real time. Implementation within Provisioning Manager to follow.

Encryption: John Nebl completed radio distribution to the smaller test group the week of 5/18/26; we requested the test group review/test the code plugs ahead of the encryption dry run. Feedback from the 5/21 Police Focus Group was positive thus far. Once the review is complete we can start making all the code plugs. Nate Krause has go-live training materials drafted, minor tweaks in progress. Matt/Jen checking consolettes at both dispatch centers for OTAR/OTAP. 06/23/26 remains the current go live target.

Solving for safer. Communities, schools, hospitals, businesses everywhere.

1. **CALL TO ORDER**

2:00 PM meeting was called to order by Chair Selvik at 2:01 PM.

Chair Selvik said there was a request that was made to allow remote participation for Member Benjamin. Under Section 7a of the Open Meetings Act, If a quorum of the members of the public body is physically present as required by Section 2.01, a majority of the public body may allow a member of that body to attend the meeting by other means if the member is prevented from physically attending because of: (I) personal illness or disability; (ii) employment purposes or the business of the public body; or (iii) a family or other emergency. A motion was made by Member Fleury, seconded by Member Jansen to allow Member Benjamin to remotely participate via Zoom. On voice vote, all Members voted “Aye”, motion carried.

2. **ROLL CALL**

Attendees:

- Nate Krause, DuPage Emergency Telephone System Board
- Eve Kraus, DuPage Emergency Telephone System Board (Remote)
- Gregg Taormina, DuPage Emergency Telephone System Board (Remote)
- Andres Gonzalez, DuPage Emergency Telephone System Board
- Lou Hayes, Jr., Hinsdale PD (Remote)
- Jennifer Hurd, Motorola
- Nick Kottmeyer, County Board Office
- John Nebl, OHSEM

On roll call, Members Benjamin (Remote), Burmeister, Clark, Fleury, Jansen and Selvik were present which constituted a quorum.

PRESENT	Selvik, Burmeister, Clark, Fleury, and Jansen
REMOTE	Benjamin

3. **PUBLIC COMMENT**

There was no public comment.

4. CHAIR'S REMARKS - CHAIR SELVIK

There were no remarks from Chair Selvik.

5. MEMBERS' REMARKS

There were no Members' remarks.

6. CONSENT ITEMS

8. PARENT COMMITTEE APPROVAL REQUIRED

8.A. [ETS-R-0041-26](#)

Resolution to approve access to the DuPage Emergency Dispatch Interoperable Radio System (DEDIR System) CommandCentral Aware to multiple agencies, pursuant to Policy 911-005.13: DuPage Emergency Dispatch Interoperable Radio System (DEDIR System) CommandCentral Aware.

PAC recommend approval to ETS Board. (Yes: 6 No: 0 Absent: 0).

On voice vote, all Members voted “Aye”, motion carried.

Attachments: [CommandCentral Aware Applications_Redacted](#)

RESULT:	ETSB RECOMMENDED FOR APPROVAL
MOVER:	Chris Clark
SECONDER:	Craig Jansen

8.B. [ETS-R-0012-26](#)

Resolution to approve the language of Policy 911-005.6: DuPage Emergency Dispatch Interoperable Radio System (DEDIR System) Use of Emergency Button.

Member Benjamin made a motion to recommend approval to the ETS Board, seconded by Member Burmeister.

Member Benjamin explained that DU-COMM’s general counsel, John Kelly, had been unable to meet with ASA Mark Winistorfer to discuss the matter and amended his motion to table the item until that meeting could occur. Member Burmeister asked about establishing a timeline, noting the item had remained on the agenda since July and agencies at ACDC were requesting updates. Member Benjamin stated multiple attempts had been made by Mr. Kelly to coordinate the meeting without success. Deputy Director Krause added that ASA Winistorfer had communicated that he had attempted to connect with Mr. Kelly, but had not yet been successful. Member Benjamin and Deputy Director Krause agreed to follow up. Chair Selvik stated the motion was amended to table the item until the June 1, 2026 meeting. Member Jansen seconded the motion.

On voice vote, all Members voted “Aye,” motion carried.

9. DEDIR SYSTEM

Deputy Director Krause reported that encryption efforts had continued to progress, with all console background updates completed at both PSAPs by Motorola. He stated that ETSB staff and Motorola were continuing work on code plug creation and fleet map approvals. He explained that updates performed by Motorola, STARCOM, and KMF teams had delayed the original timeline, and the target date shifted from May 25 to early June, with a more likely timeframe of the week of June 8.

Vice Chair Clark noted that a Fire Focus Group meeting had been scheduled for the 13th at 1:30 PM to review items including code plug programming for Tait mobile radios. John Nebl raised a discussion item regarding the placement and ordering of talkgroups within the police template, noting that the Naperville zone would be added following the finalized agreement. He explained that one option was to prioritize neighboring agencies most frequently used, while the current structure followed alphabetical order. Chair Selvik indicated that a Police Focus Group meeting was not necessary for this decision and suggested proceeding with a practical approach that prioritized neighboring agencies. John Nebl agreed to work with Jennifer Hurd to develop draft options for review and further discussion.

10. OLD BUSINESS

There was no old business.

11. NEW BUSINESS

There was no new business.

12. ADJOURNMENT**12.A. Next Meeting: Monday, June 1, 2026 at 2:00pm in Room 3-500A**

Member Fleury made a motion to adjourn the meeting at 2:13 pm, seconded by Member Jansen. On voice vote, motion carried.

Respectfully submitted,

Andres Gonzalez

ETSB PAC Resolution

421 N. COUNTY FARM ROAD
WHEATON, IL 60187
www.dupagecounty.gov

File #: ETS-R-0051-26

Agenda Date: 6/10/2026

Agenda #: 8.A.

RESOLUTION TO APPROVE ACCESS TO THE DU PAGE EMERGENCY DISPATCH INTEROPERABLE RADIO SYSTEM TALK GROUPS PURSUANT TO POLICY 911-005.2: ACCESS TO THE DU PAGE EMERGENCY DISPATCH INTEROPERABLE RADIO SYSTEM (DEDIR SYSTEM), AS REQUESTED BY MUNICIPAL CONSOLIDATED DISPATCH

WHEREAS, the DuPage County Emergency Telephone System Board (“DU PAGE ETSB”) is an emergency telephone system board, established pursuant to Section 15.4 of the Local Government Emergency Telephone System Act, 50 ILCS 750/15.4 (“Act”); and

WHEREAS, the DU PAGE ETSB is authorized and empowered, pursuant to Section 15.4 (b) of the Act to plan, implement, upgrade, and maintain an Emergency 9-1-1 System for citizens of the County of DuPage and portions of Cook, Kane and Will counties; and

WHEREAS, the DU PAGE ETSB DuPage Emergency Dispatch Interoperable Radio System (“DEDIR System”) was implemented to provide Emergency 9-1-1 radio communication services through STARCOM21 Site 1 for secure and accessible communications for its member users; and

WHEREAS, Municipal Consolidated Dispatch has requested access to certain talk groups of DEDIR System pursuant to Policy 911-005.2: Access to the DuPage Emergency Dispatch Interoperable Radio System (DEDIR System), and in the spirit of public safety and first responder interoperability; and

WHEREAS, Municipal Consolidated Dispatch’s application has been recommended for approval by the DU PAGE ETSB Policy Advisory Committee (“PAC”) in accordance with policy; and

WHEREAS, the DU PAGE ETS Board has received and reviewed the application of Municipal Consolidated Dispatch detailed in Attachment A of this resolution.

NOW, THEREFORE BE IT RESOLVED, that DuPage ETSB hereby grants access to DEDIR System to Municipal Consolidated Dispatch according to ETS-R-0013-18, Policy 911-005.2: Access to the DuPage Emergency Dispatch Interoperable Radio System (DEDIR System), by this resolution.

Enacted and approved this 10th day of June, 2026 at Wheaton, Illinois.

Re: ETSB DEDIRS System Application

In addition to InterOp Groups 1-8 we would also submit for consideration access to the following groups:

- **UNIFIEDS** – For interoperability of DuPage Agencies Adjacent to our service area. (Particularly Schiller Park)
- **Community Locals** - For interoperability of DuPage Agencies Adjacent to our service area.
- **FD Dispatch** – Primarily FD radios for Auto/Mutual Aid with Schiller Park Fire & Norwood Park FPD.
- **FD Wide** - Primarily FD radios for Auto/Mutual Aid with Schiller Park Fire & Norwood Park FPD.
- **Police Dispatch** - For interoperability of DuPage Agencies Adjacent to our service area. (Particularly Schiller Park)
- **Police Wide** – Interoperability for Mutual AID / ILEAS for Agencies Adjacent to our service area.
- **DUP Flash** – Mutual Aid / ILEAS interoperability for agencies and incidents adjacent to our service area.

I submit this list for your consideration.

Sincerely,

Ronald Gross, Executive Director

Emergency Telephone System Board of DuPage County

This Memorandum of Understanding (MOU) is an agreement between the Emergency Telephone System Board of DuPage County (DuPage ETSB) and the **Municipal Consolidated Dispatch** allowing for the sharing of talkgroups on the STARCOM21 Radio Network (SC21). The purpose is to allow each party's respective agencies access to talkgroups for interoperating on the SC21 network. Agency agrees to keep this list confidential and only share it with personnel that have a need to know the below-listed information. Agency understands that this document is not public information and should not be disclosed pursuant 5 ILCS 140/7(d)(6) and (v) as well as 20 ILCS 2615/1 and 12.

RESOLUTION TO APPROVE THE LANGUAGE OF POLICY 911-005.6: DUPAGE EMERGENCY DISPATCH INTEROPERABLE RADIO SYSTEM (DEDIR SYSTEM) USE OF EMERGENCY BUTTON

WHEREAS, the DuPage County Emergency Telephone System Board (“DU PAGE ETSB”) is an emergency telephone system board, established pursuant to Section 15.4 of the Local Government Emergency Telephone System Act, 50 ILCS 750/15.4 (“Act”); and

WHEREAS, the DU PAGE ETSB is authorized and empowered, pursuant to Section 15.4 (b) of the Act to plan, implement, upgrade, and maintain an Emergency 9-1-1 System; and

WHEREAS, the DU PAGE ETSB shall develop policies in order to plan, implement, upgrade, and maintain the DuPage ETSB 9-1-1 System; and

WHEREAS, the purpose of this resolution is to approve the language of Policy 911-005.6: DuPage Emergency Dispatch Interoperable Radio System (DEDIR System) Use of Emergency Button, initially adopted by DU PAGE ETSB on November 9, 2022; and

WHEREAS, DU PAGE ETSB Policy 911-005.6: DuPage Emergency Dispatch Interoperable Radio System (DEDIR System) Use of Emergency Button has been approved by the DU PAGE ETSB Policy Advisory Committee (PAC) as Section 5.3.B; and

WHEREAS, the Board members of DU PAGE ETSB have reviewed Policy 911-005.6: DuPage Emergency Dispatch Interoperable Radio System (DEDIR System) Use of Emergency Button for the purpose of providing guidance for the Use of Emergency Button on the DuPage Emergency Dispatch Interoperable Radio System (DEDIR System).

NOW, THEREFORE BE IT RESOLVED, that the DU PAGE ETSB Policy 911-005.6: DuPage Emergency Dispatch Interoperable Radio System (DEDIR System) Use of Emergency Button be, and it is hereby adopted.

Enacted and approved this 10th day of June, 2026 at Wheaton, Illinois.

GREG SCHWARZE, CHAIR

Attest: _____

JEAN KACZMAREK, COUNTY CLERK

Emergency Telephone System Board Of DuPage County Policy and Procedures

Policy #: 911- 005.6
Previous Policy(s): 4.2.2
Effective Date: April 10, 2018
Revised: November 9, 2022, February 11, 2026

DuPage Emergency Dispatch Interoperable Radio System (DEDIR System) Use of Emergency Button

Purpose:

The purpose of this policy is to ensure compliance with State of Illinois STARCOM21 and DEDIR System requirements for use and access of DEDIR System talk groups for the purpose of interoperability for emergency communications by acknowledging industry standards for definitions, terminology

Additional Authority:

50 ILCS 750 Emergency Telephone System Act
20 ILCS 2615 Illinois State Police Radio Act

Goal:

It is the goal of the Emergency Telephone System Board of DuPage County (DuPage ETSB) to provide one seamless method of interoperable communication for use by agencies on DEDIR System for non-member agencies.

Scope:

This policy shall apply to all Public Safety Answering Points (PSAPs) in the DuPage ETSB 9-1-1 System, including all Telecommunicators and other employees of the PSAP, user agencies or DuPage ETSB staff, contracted vendors or other authorized agents, DEDIR System users and agencies receiving approval to access DEDIR System talk groups.

I. Policy Statement

DuPage ETSB leases a portion of the Motorola Solutions, Inc. STARCOM21 network in Illinois as an integrated component of its emergency dispatch telephone system. The system permits communication between telecommunicators and the first responding personnel they dispatch in response to calls placed to 9-1-1. The system also permits personnel from public safety agencies throughout the County to communicate with each other during emergency joint response situations.

To achieve seamless interoperable communication, standardization of operation and naming conventions are required to ensure that first responders can effectively operate subscriber units while on duty but especially during critical, active incidents when speed and accuracy are critical.

As defined in Policy #: 911- 005.5, a "Talk group" is the term given to assigned groups on a trunked radio system. Unlike a conventional radio which assigns users a certain frequency, a trunk system takes a number of frequencies allocated to the system. The control channel then coordinates the system so talk groups can share these frequencies seamlessly. The purpose is to dramatically increase bandwidth.

Policy 911- 005.6 shall deal specifically with the use of the emergency button on the subscriber unit.

Emergency Telephone System Board Of DuPage County Policy and Procedures

The PSAPs may establish operational policies for reacting to emergency activations as directed by their respective governing/advisory bodies. Any such operational policies established by the PSAPs shall not conflict with or nullify policies established by the ETSB. In the event any policy established by a PSAP conflicts with or renders any ETSB policy a nullity, the ETSB policy shall control, and the PSAP's policy shall be null and void as if never enacted. The body resolving any dispute of policy conflict shall be the ETS Board based on simple majority. The policies shall be published and accessible to surrounding PSAPs and the ETSB. The PSAPs shall notify the ETSB of any establishment or amendment of a policy controlled by this section immediately.

II. Emergency Button

DEDIR System utilizes two radio technologies, digital trunked and conventional simplex.

This procedure describes the function of and the appropriate use for the emergency button on DEDIR System portable radios. The objective is the proper use of the emergency button as well as a predictable, communicated, course of action by all DuPage County PSAPs and field personnel. It is important to note that the emergency button will operate on trunked talk groups, as well on conventional channels, although those channels might not have the equipment in place to monitor this activity. It should be noted the operation of the radio may differ (even slightly) when the emergency button is activated in the STARCOM21 (trunked) mode and the conventional mode.

III. Trunked Talk Groups

- a. The emergency button is used:
 1. To send an emergency notification when field personnel are in distress, or
 2. When the user is unable to transmit a verbal emergency message due to heavy radio traffic.
- b. Pressing the Emergency Button on a STARCOM21 Talk group:
 1. Emergency button activation will display the 6 digit radio identification number, alias name (e.g. ADSN CHF 100) and the talk group name on the radio consoles.
 2. The affected user's radio will flash "EMERGENCY" on the radio's display screen.
 3. The affected user that activated his or her emergency button will have priority over any other radio transmitting on the same talk group.
 4. During this time, the radio speaker will remain active, meaning affiliated subscriber units will hear all the radio traffic.
 5. The policy of wearing an earpiece will be dictated by the officers jurisdiction.

IV. Conventional Channels

- a. The emergency button is used:
 1. To send an emergency notification when field personnel are in distress.
- b. Pressing the Emergency Button on a conventional channel:
 1. Emergency button activation will display a 4 digit radio identification number and the frequency name on radio consoles that have that frequency. For example, a dispatch

Emergency Telephone System Board Of DuPage County Policy and Procedures

console may display an emergency for primary fire dispatch frequency, but not for fire ground red if that frequency is not monitored by the console.

2. The affected user's radio will flash "EMERGENCY" on the radio's display screen.
 3. Once the affected user pushes the Push-to-talk (PTT), some radios (depending on the model) will be able to decode the emergency signal. They might be able to convert the 4 digit radio ID to an alias name if they have the current aliases programmed in their radio.
 4. The affected user that activated his or her emergency button will be competing with any other radio transmitting on the same channel.
- V. Actions to be taken upon receipt of an Emergency Button activation
- a. The assigned Telecommunicator for a monitored talk group or channel will transmit "William 1 (for instance), you have an E1," (or similar procedure that the PSAP has established for checking the status of a unit). If the alarm is for a non-monitored talk group, any console Telecommunicator can pull up the alarm window and handle the alarm. The level of activity at the communications center will determine which Telecommunicator handles non-monitored talk group alarms.
 - b. The Telecommunicator should attempt to contact the affected user (Police officer, firefighter, or other user). If the user that has activated his/her alarm cannot be reached over the radio after two (2) attempts, the Telecommunicator shall immediately dispatch backup if the location is known, and notify the Watch Commander/Shift Supervisor/Incident Commander. The Watch Commander/Shift Supervisor/Incident Commander shall make every effort to contact the affected person by any means necessary. This action shall be taken whether the user is believed to be on duty or not.
 - c. When the PSAP is notified of emergency button activation from a radio belonging to one of their assigned units currently working with an outside PSAP, the home PSAP will immediately advise the outside PSAP of the emergency button activation. The outside PSAP will advise the home PSAP when the activation has been resolved.
 - d. All units assigned to a channel which experiences an emergency button activation shall remain off the radio, except for emergency communications, until the activation is resolved.
 - e. Once the affected user has been successfully contacted by the Telecommunicator, the affected user shall respond and include the word "**ACCIDENTAL**" in his or her response. If the affected user does not use the word "**ACCIDENTAL**," the Telecommunicator should assume that the emergency activation is valid and immediately dispatch backup and alert the Watch Commander/Shift Supervisor/Incident Commander. If the user provides a response which in any way indicates that the signal was "**ACCIDENTAL**," (without having to remember the specific phraseology), the Telecommunicator shall announce that the activation is accidental and clear the alarm from the console screen.
 - f. If the location of the affected user is not known, the Telecommunicator shall immediately announce the affected user's alarm activation and request that any information about his or her last activity or location be relayed to the PSAP.

Emergency Telephone System Board Of DuPage County Policy and Procedures

- g. Verification activities may vary from agency to agency, but after an activation, the supervisor or his or her designee should confer with the affected user to confirm that he or she is safe.
- h. Agencies should establish similar policies for field units operating on conventional and/or tactical channels which might not be monitored by dispatch. In these cases, the Watch Commander/ Shift Supervisor/Incident Commander is responsible for the activities that would have been handled by the PSAP.
- i. Exigent or Active Situations
 - 1. PSAP: Any of the above steps may be accelerated or skipped if the Telecommunicator immediately believes the activation is valid based on all available information. In that case, the Telecommunicator will take any actions believed necessary to assist the officer in need.
 - 2. Agency: An agency's command staff or scene commander may request accelerated or skipped steps from the above procedure based on local or acute factors requiring a change and will notify the PSAP/Telecommunicator of such change.
 - 3. In either instance, such changes will be deemed temporary to an event or situation and the agency shall rescind the changes and return to the procedural steps at the conclusion of the event or when the threat causing the change has diminished or ceased. Changes may be made to the procedure to the extent they do not conflict or nullify this policy and any such conflicts shall be addressed in the manner set forth in section I above. The PSAPs shall notify the ETSB of any establishment or amendment of a policy controlled by this section immediately.

VI. Resetting the Emergency Button Activation

After activation of the emergency button on the APEX radio, the user must reset the button activation, which can be accomplished on one of two ways:

- a. The operator can push and hold the orange emergency button for approximately 3 seconds; he or she will hear a tone and the emergency button will reset or
- b. Turn off the radio, wait approximately 3 seconds and turn the radio back on; this will reset the radio.

Policy adopted: _____

Greg Schwarze, Chair

Emergency Telephone System Board Of DuPage County Policy and Procedures

Policy #: 911- 005.6: Emergency Button Activation and Reset

As the senior officer/department for my agency, I hereby acknowledge that the DEDIR System users under my command and/or authority have received and been trained on DuPage ETSB Policy #911-005.6: Emergency Button Activation and Reset.

In addition, going forward, this agency will:

1. On an annual basis review and train on DuPage ETSB Policy #911-005.6: Emergency Button Activation and Reset.
2. Provide a copy of this form annually when training of subscriber users has been complete, including a roster of users using ETSB911@dupagecounty.gov the main DuPage ETSB email.

I understand that the conditions set forth above have been implemented to ensure first responder safety and DEDIR System standardization.

Emergency Telephone System Board Of DuPage County Policy and Procedures

Policy #: 911- 005.6
Previous Policy(s): 4.2.2
Effective Date: April 10, 2018
Revised: November 9, 2022, February 11, 2026

DuPage Emergency Dispatch Interoperable Radio System (DEDIR System) Use of Emergency Button

Purpose:

The purpose of this policy is to ensure compliance with State of Illinois ~~STARCOMM~~~~STARCOM~~21 and ~~DEDIR~~~~DEDIR System~~ requirements for use and access of ~~DEDIR~~~~DEDIR System~~ talk groups for the purpose of interoperability for emergency communications by acknowledging industry standards for definitions, terminology

Additional Authority:

~~Public Act 100-002~~

~~50 ILCS 750 Emergency Telephone System Act~~

~~50 ILCS 751 Wireless Emergency Telephone Safety Act~~

~~83 Illinois Administrative Code Part 725~~

~~83 Illinois Administrative Code Part 1325.415(m)~~

~~OEX-003B-89 Amending Section 40-20 of the DuPage County Code Pertaining to the Emergency Telephone System Board~~

~~20 ILCS 2615 Illinois State Police Radio Act~~

Goal:

It is the goal of the Emergency Telephone System Board of DuPage County (DuPage ETSB) to provide one seamless method of interoperable communication for use by agencies on ~~DEDIR~~~~DEDIR System~~ for non-member agencies.

Scope:

This policy shall apply to all Public Safety Answering Points (PSAPs) in the DuPage ETSB 9-1-1 System, including all Telecommunicators and other employees of the PSAP, user agencies or DuPage ETSB staff, contracted vendors or other authorized agents, ~~DEDIR~~~~DEDIR System~~ users and agencies receiving approval to access ~~DEDIR~~~~DEDIR System~~ talk groups.

I. Policy Statement

DuPage ETSB leases a portion of the Motorola Solutions, Inc. ~~STARCOMM~~~~STARCOM~~21 network in Illinois as an integrated component of its emergency dispatch telephone system. The system permits communication between telecommunicators and the first responding personnel they dispatch in response to calls placed to 9-1-1. The system also permits personnel from public safety agencies throughout the County to communicate with each other during emergency joint response situations.

To achieve seamless interoperable communication, standardization of operation and naming conventions are required to ensure that first responders can effectively operate subscriber units while on duty but especially during critical, active incidents when speed and accuracy are critical.

Emergency Telephone System Board Of DuPage County Policy and Procedures

As defined in Policy #: 911- 005.5, a “Talk group” is the term given to assigned groups on a trunked radio system. Unlike a conventional radio which assigns users a certain frequency, a trunk system takes a number of frequencies allocated to the system. The control channel then coordinates the system so talk groups can share these frequencies seamlessly. The purpose is to dramatically increase bandwidth.

Policy 911- 005.6 shall deal specifically with the use of the emergency button on the subscriber unit.

The PSAPs shall may establish operational policies for reacting to emergency activations as directed by their respective governing/advisory bodies. Any such operational policies established by the PSAPs shall not conflict with or nullify policies established by the ETS Board. In the event any policy established by a PSAP conflicts with or renders any ETSB policy a nullity, the ETSB policy shall control, and the PSAP’s policy shall be null and void as if never enacted. The body resolving any dispute of policy conflict shall be the ETS Board based on simple majority. The policies willshall be published and accessible to surrounding PSAPs and the ETSB. The PSAPs shall notify the ETSB of any establishment or amendment of a policy controlled by this section immediately.

II. Emergency Button

~~DEDIR~~DEDIR System utilizes two radio technologies, digital trunked and conventional simplex.

This procedure describes the function of and the appropriate use for the emergency button on DEDIR System portable radios. The objective is the proper use of the emergency button as well as a uniform predictable, communicated, course of action by all DuPage County PSAPs and field personnel. It is important to note that the emergency button will operate on trunked talk groups, as well on conventional channels, although those channels might not have the equipment in place to monitor this activity. It should be noted the operation of the radio may differ (even slightly) when the emergency button is activated in the STARCOM21 (trunked) mode and the conventional mode.

III. Trunked Talk Groups

- a. The emergency button is used:
 1. To send an emergency notification when field personnel are in distress, or
 2. When the user is unable to transmit a verbal emergency message due to heavy radio traffic.
- b. Pressing the Emergency Button on a STARCOM21 Talk group:
 1. Emergency button activation will display the 6 digit radio identification number, alias name (e.g. ADSN CHF 100) and the talk group name on the radio consoles.
 2. The affected user’s radio will flash “EMERGENCY” on the radio’s display screen.
 3. The affected user that activated his or her emergency button will have priority over any other radio transmitting on the same talk group.
 4. During this time, the radio speaker will remain active, meaning affiliated subscriber units will hear all the radio traffic.
 5. The policy of wearing an earpiece will be dictated by the officers jurisdiction.

IV. Conventional Channels

Emergency Telephone System Board Of DuPage County Policy and Procedures

- a. The emergency button is used:
 1. To send an emergency notification when field personnel are in distress.
- b. Pressing the Emergency Button on a conventional channel:
 1. Emergency button activation will display a 4 digit radio identification number and the frequency name on radio consoles that have that frequency. For example, a dispatch console may display an emergency for primary fire dispatch frequency, but not for fire ground red if that frequency is not monitored by the console.
 2. The affected user's radio will flash "EMERGENCY" on the radio's display screen.
 3. Once the affected user pushes the Push-to-talk (PTT), some radios (depending on the model) will be able to decode the emergency signal. They might be able to convert the 4 digit radio ID to an alias name if they have the current aliases programmed in their radio.
 4. The affected user that activated his or her emergency button will be competing with any other radio transmitting on the same channel.

V. Actions to be taken upon receipt of an Emergency Button activation

- a. The assigned Telecommunicator for a monitored talk group or channel will transmit "William 1 (for instance), you have an E1," (or similar procedure that the PSAP has established [for checking the status of a unit](#)). If the alarm is for a non-monitored talk group, any console Telecommunicator can pull up the alarm window and handle the alarm. The level of activity at the communications center will determine which Telecommunicator handles non-monitored talk group alarms.
- b. The Telecommunicator should ~~hold the air and~~ attempt to contact the affected user (Police officer, firefighter, or other user). If the user that has activated his/her alarm cannot be reached over the radio after two (2) attempts, the Telecommunicator shall immediately [dispatch backup if the location is known, and](#) notify the Watch Commander/Shift Supervisor/Incident Commander. The Watch Commander/Shift Supervisor/Incident Commander shall make every effort to contact the affected person by any means necessary. This action shall be taken whether the user is believed to be on duty or not.
- c. When the PSAP is notified of emergency button activation from a radio belonging to one of their assigned units currently working with an outside PSAP, the home PSAP will immediately advise the outside PSAP of the emergency button activation. The outside PSAP will advise the home PSAP when the activation has been resolved.
- d. All units assigned to a channel which experiences [an](#) emergency button activation shall remain off the radio, except for emergency communications, until the activation is resolved. ~~If an alternate frequency has been designated by agency policy, all non-affected units and PSAPs shall switch to the alternate frequency leaving the affected unit and PSAP on the original frequency.~~
- e. Once the affected user has been successfully contacted by the Telecommunicator, the affected user shall respond and include the word "**ACCIDENTAL**" in his or her response. If the

Emergency Telephone System Board Of DuPage County Policy and Procedures

affected user does not use the word “**ACCIDENTAL**,” the Telecommunicator should assume that the emergency activation is valid and immediately dispatch backup and alert the Watch Commander/Shift Supervisor/Incident Commander ~~who will coordinate the response to the distress call~~. If the user provides a response which in any way indicates that the signal was “**ACCIDENTAL**,” (without having to remember the specific phraseology), the Telecommunicator shall announce that the activation is accidental and clear the alarm from the console screen.

- f. If the location of the affected user is not known, the Telecommunicator shall immediately announce the affected user’s alarm activation and request that any information about his or her last activity or location be relayed to the PSAP.
- g. Verification activities may vary from agency to agency, but after an activation, the supervisor or his or her designee should confer with the affected user to confirm that he or she is safe.
- h. Agencies should establish similar policies for field units operating on conventional and/or tactical channels which might not be monitored by dispatch. In these cases, the Watch Commander/ Shift Supervisor/Incident Commander is responsible for the activities that would have been handled by the PSAP.

Exigent or Active Situations:

i. Exigent or Active Situations

1. PSAP: Any of the above steps may be accelerated or skipped if the Telecommunicator immediately believes the activation is valid based on all available information. In that case, the Telecommunicator will take any actions believed necessary to assist the officer in need.
1. Agency: This policy notwithstanding, an agency’s command staff or scene commander agencies may develop their own policies regarding request accelerated or skipped steps from the above procedure based emergency activations due to local or acute factors requiring a change and will notify the PSAP/Telecommunicator of such change.
3.

In either instance, such changes will be deemed temporary to an event or situation and the agency shall rescind the changes and return to the procedural steps at the conclusion of the event or when the threat causing the change has diminished or ceased. Changes may be made to the procedure to the extent they do not conflict or nullify this policy and any such conflicts shall be addressed in the manner set forth in section I above. The PSAPs shall notify the ETSB of any establishment or amendment of a policy controlled by this section immediately.

VI. Resetting the Emergency Button Activation

After activation of the emergency button on the APEX radio, the user must reset the button activation, which can be accomplished on one of two ways:

- a. The operator can push and hold the orange emergency button for approximately 3 seconds; he or she will hear a tone and the emergency button will reset or
