Re: DuPage County Trail System User Counts
24-DCTRP-01-EG
Various Locations throughout DuPage County
Proposal for Traffic Count Services

Dear John,

We are pleased to provide the following scope for the trail counts for twenty-two (22) pathway segments and fourteen (14) pathway junctions throughout the trail system in DuPage County in Illinois.

This fee proposal is based on our team's selection for the project and the Engineering Services Scoping meeting held on January 26, 2024, our email and phone conversations thereafter. This scope and fee includes coordination with you as required to provide the trail counts for the project. A specific list of scope of work and deliverables is listed below:

SCOPE OF WORK/ANTICIPATED DELIVERABLES

1. General

- A. Coordinate with the DuPage County as required.
- B. Provide Deliverables

2. Traffic Data Collection

- A. Field Investigation/Equipment Preparation:** TERRA will field verify all locations with respect to considerations for performing the counts in the most efficient and appropriate manner. TERRA will discuss the count schedule with DuPage County in order to verify locations, identify special needs, and to detail count locations.
 - i. TERRA's team will review the locations in the field to determine the optimal camera positions for each station. These approximate stations will be approximated within the Miovision system during the upload process to show the location and orientation of the unit.
 - ii. TERRA will place counters to ensure the stability of the camera at the mounting locations and that the camera will be able to record quality video.
 - iii. TERRA will use video units with GPS capabilities which will allow the locations to be monitored remotely to ensure video recordings are being completed properly.

B. Data Collection: TERRA will perform the intersection counts at thirty-six (36) total locations from 5:00 AM to 10:00 PM, on a typical weekend including counts on both Saturday and Sunday for a total of 34 hours at each location. Such counts will be completed using video recorders. These counts will be recorded in the field and then uploaded and processed to obtain trail system bicycle and pedestrian counts.

C. Count Locations: Trail counts will be collected at the following locations. It should be noted that the data will be collected using typical count procedures such as no work on days when a well-publicized threat of frozen precipitation has been forecast, on state-recognized holidays, nor during the times influenced by holidays. Data will be provided in both excel format as well as PDF format. Counts will also be output for format and mapping in the DuPage County GIS system. The planned locations to be collected are as follows:

The above locations are the projected locations for the counts, although the locations can be modified to mutually agreed upon alternatives as necessary. Any locations where the video camera malfunctions will be rescheduled and recounts will be performed to ensure acceptable counts are obtained.

- D. Data Report:** TERRA will produce a written report detailing the methods, procedures, locations and results of the trail count effort. This will include a picture of the camera setup, approximate location, count data and camera view from each location.

3. SCHEDULE

- A. Count Schedule:** Upon Notice to Proceed from DuPage County, TERRA will commence with review of the count locations and scheduling of the traffic counts. It is understood that, weather permitting, the data collection of the trails should be completed prior to June 30, 2024 and that the full project should be completed by November 30, 2024. TERRA will develop a schedule for the trail counts and the overall project delivery to be shared with DuPage County after Notice to Proceed is received. As these counts and hours are dependent on good weather, the schedule and budget may need to be adjusted if impacted by storm events.

Sincerely yours,

TERRA ENGINEERING, LTD.
