This AGREEMENT is an on-call AGREEMENT that will have tasks assigned by the Director. These services may include the following:

1. **Final Surveying** - Conduct field survey as needed for the preparation of final design plans, specifications, contract documents, and plats of survey for the recommended improvements. Determine the locations and elevations of utilities, physical structures, pavements and other pertinent items (to be placed on final engineering plans). The COUNTY will provide digital two-foot topographic maps. A minimum of two permanent benchmarks are to be established within the project site for future use. Descriptions of the permanent benchmarks shall be included on the final plan set. All benchmarks shall be tied into the DuPage County system of benchmarks.
2. **Final Stormwater Modeling** - Develop final hydrologic/hydraulic computer model as necessary for final permitting requirements. Simulations shall be run for both existing and proposed 'final design' conditions. The modeling method to be utilized shall be approved by DuPage County staff prior to commencement of services. If necessary, for the evaluation of the final design, a downstream hydraulic analysis will be required to evaluate potential impacts to downstream properties.
3. **Wetland Report & Analysis** – Develop wetland report detailing potential wetland impacts and required wetland avoidance arguments per the requirements set forth by the County of DuPage and the U.S. Army Corp of Engineers. If project is located in close vicinity to regulatory wetlands, all required wetland field services will be included in the project scope. Only wetland firms previously approved by the County of DuPage will be allowed to serve as subconsultants on project design.
4. **Final Permitting** - Prepare and submit the necessary plans and permit applications to the appropriate agencies. These may include but not be limited to the following: The US Army Corps of Engineers, DuPage County Stormwater Management, DuPage County DOT, DuPage County Forest Preserve District, The Illinois Department of Conservation, The Illinois EPA, Illinois Department of Natural Resources, IDOT–Bureau of Roads, IDOT-Bureau of Hydraulics, and the Federal Emergency Management Agency. The CONSULTANT shall be required to obtain all permits necessary for the construction of the final project design, unless explicitly directed otherwise in writing by the COUNTY.

The engineering plans shall generally consist of plan and profile view drawings of the proposed improvements to a scale agreed upon with County staff, a project location map, general construction notes, a traffic control plan, an erosion control plan, a legend describing the symbols used, a summary of quantities, detailed drawings of proposed service items and methods, and cross sections at appropriate locations. For each item of the proposed improvements, the CONSULTANT shall be required to prepare detailed construction specifications describing the services to be done to complete the item, material requirements, construction requirements, testing requirements, method of measurement, and basis for payment. Final engineering plans and specifications shall be signed and sealed by a registered Professional Engineer licensed to do business in the State of Illinois.
