From: Ron Schlager Business Services Manager, DuPage Workforce Development Division
RE: Incumbent Worker Training Application – CamCraft

CamCraft applied for, and was approved for, IWT funding provided by Made to Measure Metrology. These trainings will strengthen the company's capabilities in precision measurement, quality assurance, and advanced manufacturing support.

There is a clear need for this training due to increased demand for advanced metrology and GD&T expertise across the industries they serve. The skills gained will enable employees to perform at the required level in manufacturing environments, improve communication between engineering, quality, and production teams, and reduce waste by ensuring consistent understanding of precision machining requirements.

The Blueprint Reading, Basic Metrology, and GD&T Fundamentals training provides instruction in interpreting shop blueprints, technical drawings, and engineering prints, as well as correctly applying and verifying GD&T in real-world production and inspection settings. Coursework includes inspection-driven tolerancing, functional datum selection, and avoiding over-constraint in drawings.

From a company perspective, these trainings will improve productivity, efficiency, and overall product quality.

Notes:

- * CamCraft — 250 Employees
- * Located in Hanover Park, Illinois
- * Number of Incumbent Workers to be Trained: 45
- * Total Amount Approved: \$25,000
