MEMORANDUM

TO: Environmental Committee

FROM: Joy Hinz, Environmental & Sustainability Programs Manager

DATE: June 26, 2024

RE: Solar Switch Summer 2024

Solar Switch is a program offered by nonprofits Midwest Renewable Energy Association and Citizens Utility Board in partnership with various northeastern Illinois counties including DuPage. The program includes Solar Power Hours held by CUB that teach residents about solar and how to take advantage of the incentives currently available to residents. It also touches on community solar and the Illinois Solar For All program which are other methods to secure solar.

Solar Switch connects residents with the opportunity to have qualified, vetted solar installers bid on their project which reduces installation costs. During the 2023 program, a total of 313 homeowners in the region opted to install solar with an average savings of \$4,965 on a standard-sized solar installation. The current program letting has launched and will be open through August 21, 2024.

MEMORANDUM

TO: Environmental Committee
FROM: Joy Hinz, Environmental & Sustainability Programs Manager
DATE: June 25, 2024
RE: Portable and Medium-Format Battery Stewardship Act

Building Division

Zoning & Planning Division

Environmental Division

On May 24, 2024, the Illinois General Assembly passed the Portable and Medium-Format Battery Stewardship Act. Upon signature of the Governor, the Act will require that battery producers implement a stewardship plan to collect and recycle portable and medium-format batteries. No person will be able to sell covered batteries or battery containing products that are covered under the Act unless they are part of a stewardship plan which includes the collection and recycling of batteries. A landfill ban and proper labeling will follow with effective dates January 1, 2028, and January 1, 2029. The legislation includes minimum collection sites based on population for portable batteries and at least ten permanent collection sites in Illinois and one in every county with a population of at least 200,000 for medium-format batteries.

Education and outreach including the development and maintenance of a website, periodic press releases and articles, social media and other relevant media and other promotional materials must be provided by the stewardship organization.

In addition to this legislation, the Illinois Environmental Protection Agency has received funding from the U.S. Department of Energy for the enhanced collection and recycling of batteries throughout the State. The grant performance period is up to 36 months from grant agreement.

For reference a *portable battery* means the following primary or rechargeable batteries: (1) for rechargeable batteries, a battery weighing no more than 11 pounds and having a rating of no more than 300-watt hour; (2) for primary batteries, a battery weighing no more than 4.4 pounds.

A *medium-format battery* means the following primary or rechargeable covered batteries: (1) for rechargeable batteries, a battery weighing more than 11 pounds or having a rating of more than 300 watt-hours, or both, and no more than 25 pounds and having a rating of no more than 2,000 watt-hours; (2) for primary batteries, a battery weighting at least 4.4 pounds but not more than 25 pounds.
