IT Project Updates & AI Presentation

**Attachments:**     [DuPage County Tech Committee Project Updates\\_07-11-23](#)

CIO Anthony McPhearson provided project updates to the committee on enterprise projects, noting that IT has many more operational projects occurring as well. Regarding the new ERP implementation, Member Cahill asked how payroll was handled prior to this. Mr. McPhearson said we have an existing payroll system through Infor, adding that payroll is done in-house using that system. He explained that we will be doing outsourcing in certain areas to help augment what the county payroll team does. Board Member Evans asked if employees will have a portal to view their time and expenses. Mr. McPhearson said yes, existing functionality will not change, but rather will be enhanced.

Mr. McPhearson then discussed the move from .org to .gov. Member Carrier asked if the .org domain will still work. Mr. McPhearson said we will keep .org domain in the background for at least six months so employees are able to get their mail and users can still get to the website.

Mr. McPhearson talked about cybersecurity measures at the County, managed detection and response, and cybersecurity liability insurance.

When discussing additional project updates, Board Member DeSart asked what the FOIA request tool will do and how it will work. She asked if it will automatically filter everything regarding the request for people. Mr. McPhearson said no, it will not, but there are some efficiencies included that will help in that regard. He offered to sit down with Member DeSart and go over the process with her.

Mr. McPhearson then presented about artificial intelligence (AI), including the different types of AI, what it is, advantages with using it, why it is becoming a popular subject, common uses, ethical concerns, and how DuPage County may be able to utilize AI. Member Rutledge asked if there are any technological markers that would tell conclusively if something was generated by AI. Mr. McPhearson said it is very difficult to do so, because AI can produce it and it can be copied over to something such as a Word document. He said programmers may be able to tell on the back end in some cases. Member Gustin requested that DuPage County makes sure a customer can type in "human" and it will connect them to a human. Mr. McPhearson said we are currently working on creating a new ChatBot that is powered by ChatGPT that would take answers we have provided and get them to users more quickly. He said our plan is to make sure the chat is manned during business hours and the ChatBot will respond after hours.

Chair Yoo said she is very pleased that we have so much information regarding AI and that we are on the cutting edge of this technology is very important. She said the fact that we can potentially increase efficiencies, improve constituent engagement, communication, and strategic planning is very exciting.
