Overview			
DESCRIPTION Identify scope of work, item(s) being purchased, total cost and type of procurement (i.e., lowest bid, RFP, renewal, sole source, etc.). Replacement Mattresses for the DuPage Care Center, for the period October 25, 2023 through October 24, 2024, for a contract total not to exceed \$49,060.00 contract pursuant to the Intergovernmental Cooperation Act OMNIA Partners Cooperative Contract #2021003157. (ARPA ITEM)			
JUSTIFICATION Summarize why this procurement is necessary and what objectives will be accomplished Our current mattresses are 20-25 years old. Over time, through normal wear and tear, the integrity of the mattress surface diminishes, but the worse damage was caused by the frequent use of cleaning chemicals on the mattress surface, which occurred during the Covid-19 pandemic on a daily basis. The cleaning chemicals further breaks down the mattress surface. Once the outer lining is damaged, the surface becomes more porous and increases the likelihood of blood and body fluid penetration to the mattress core. The trapped fluids increase the risk of infection to our residents by harboring pathogens and promoting their growth. The liquid trapped in the mattress foam may leak out when another resident is placed in the bed. Importantly, the porous structure of the foam prevents a complete removal of absorbed liquid and prevents disinfectants from being effectively delivered to the entire contaminated area. Therefore, it is impossible to effectively clean and disinfect a damaged mattress with any liquid ingress. New mattresses would have an antimicrobial surface which requires less cleaning chemicals to properly disinfect the mattress.
